

Our Future is Europe - Europe is our Future

Ehh, sorry but what do you mean by that? How can Europe be someone's future? Isn't it a continent? These are questions we have been asking ourselves ever since we have been tasked with this assignment. Well, what can we say – after hours of racking our brains we have come to the conclusion that we now know that we know nothing. (source: Socrates 😊) However, we would still like to share our not so world-shaking thoughts with you, so let's begin!

*E*urope isn't just the continent we live on (as though its natural beauty isn't enough), it's also a union that connects many countries with different cultures, languages and customs. It's a place that gives everyone the opportunity to flourish and to realise the lives they want.

*U*nique. If we had to describe the European Union in one single word, that would be our pick. Over 450 million people work together to provide prosperity, unity, equality and much more for everyone. The vision is clear: To be united in diversity.

*R*ighto, that sounds pretty awesome, doesn't it? However, the question remains why Europe is our future. Well, unfortunately we are still none the wiser than at the beginning. But after endless research and leastwise a little bit of thinking it struck us – WE are the future. And since we all are part of Europe, Europe is our future.

*O*h wow, what a genius flash of wit! Moreover, the European Union ensures us a future with peace and stability, strong diplomacy and politics, and

promotes economic and technological progress to build an environment that gives us endless opportunities.

*P*upils especially are of big interest to the European Union, being the next generation to look out for the world. To ensure a good education, open-mindedness and a vision that unites people to work together, the EU offers a variety of different projects and activities such as “Erasmus +”. Consequently, students can widen their horizons and see the world from a new perspective, leading them to mature and evolve as individuals with their own unique character and diversity, still being held in a supportive society.

*E*urope is our future, don't you agree that we have determined that precisely by now? Well, we are confident to say that without the European Union, we wouldn't be able to live our lives the way we do now. We can count ourselves lucky that we can see the world through curious eyes and look into the future with a good amount of excitement.

Ahh, finally! We're done! What do you say know, huh? To be truthful, we are pretty amazed by our writing and creativity skills too. Did you catch that the first letters of all main paragraphs form the word “Europe”? You did? Let's go!! To be honest, we are really proud of our attention to detail, but let's stay humble. 😊
