

Is Europe our future?

Can Europe be our future-
with all the problems we're facing
and dreams we're chasing
Will there be a suture
with all the gaps in our society?

Anxiety

we're running out of time
to save our environment.
With all the time spent
ignoring these problems in the past
we'll be the last
ones living HERE

Fear

Of the people who don't want peace but power,
sit in their ivory tower
let people kill and die
in a war that will never end
Destroying bonds between countries,
That will never mend

Dread

Of the hate that's only growing
Over simple changeless things
Without us ever really knowing

In what direction we'll be going

If we follow hate

Expectations

We'll never meet,

If we get lost in frustration

because of what could have been

So, let's just begin

Trying to make the future a better place

Hope

In Europe, our future, in recognising the stakes,

That soon we will realise

What has to change

And do it before it's too late
