

Our future is Europe Europe is our Future

Stangl, Pungerek, 5c

Development

The number of members was never low
But maybe in the future it will grow
Between the countries was not always peace
But with the EU cohesion does increase

Climate

The climate on our earth changes
We need to do something in these ranges
We have to do something about it very fast
Before our beautiful nature is in the past

Social

The people split between the rich and the poor
But with the EU there is no judgement anymore
Some sort of support is always here
Every person has someone to help them in fear

Culture

All cultures should be respected
So no one ever feels disconnected
Every culture is special in their own way
But that is how people go through their day

And now we came to the fact
That there is more in the EU than we expect
